

Student Chapter Advisory Committee
May 2018

This has been another strong year for the National Student Council as our student leaders continue in enhancing communication with chapters and students, enhancing the student retreat programming, and sharing the mission of CPFI. This year CPFI was represented at APhA house of delegates and student activities were promoted at several pharmacy meetings. Contact Ashley Devaughan for more details on the NSC activities over the past year.

The SCAC has collaborated with 6 potential new chapters this year, and 2 have been established so far. Over the next 6 months, requirements for student membership for an active chapter will slowly go into effect.

Opportunities to serve on the SCAC are always available! If anyone is interested in working with the chapters, please encourage them to reach out.
