To Dispense or Not to Dispense, Should that Even be the Question?

CPFI National Student Council will be hosting an event at the APhA annual meeting in Baltimore, MD this year. The topic for the event is "To Dispense or not to Dispense, Should that Even be the Question?" We will be discussing a pharmacist's right to make decisions to dispense based on their beliefs. This is a free event and open to all pharmacy students, pharmacists, and conference attendees. We hope to see you there

- Tristram Ford
NSC Chairperson Elect

Chairman, Pharmacy Practice
University of Buffalo

*Topic: 'Quo Vadis: How do we discern God's will
for our lives?'*

Cost: \$25.

Operation Christmas Child Success Story

The CPFI chapter at California Northstate University, College of Pharmacy (CNUCOP) volunteers at different health fairs and community outreach events throughout the year. One of the outreach events during this year's Fall 2015 semester included Operation Christmas Child (OCC) initiated by CPFI Student Chapter at CNUCOP. This is the second year CNUCOP participated in OCC and achieved another successful outcome.

From October 26th to November 16th, student pharmacists brought gift-wrapped shoeboxes filled with gifts for children and placed them at the designated OCC decorated wall on campus. The college of pharmacy collected 88 boxes this year, beating last year's record of 56 boxes! To make the project more interesting and exciting, the P1, P2 and P3 classes competed against each other to collect the most boxes. This helped to encourage and motivate student pharmacists to work together and donate more gifts. As a result, we hope this becomes a tradition that will continue for years to come!
